

Abstract

A strapless garment (T) to cover the bosom area of a woman, the garment (T) comprises a length of material having two ends (5), breast receiving cups (6) being present between the ends (5), a layer of hypoallergenic adhesive (H) being permanently secured at either end (5) of the material which, in use, will contact or is contactable with the body of the wearer, the outer surface of the layer of adhesive (H) being covered by a releasable cover (7). The adhesive (H) may be formulated to allow the garment (T) to be removed and re-applied a plurality of times.
